25X1A9a

MEMORANDUM FOR

FROM:

Deputy Director (Intelligence)

SUBJECT:

Coilings

1. In a conversation with DCI, 31 July, I advanced the view that the general principle on which an over-all ceiling should be applied to the Agency should be that of preserving, roughly speaking, intact the intelligence activities of the Agency, including the ID/I area and FI, and concentrating any shrinkage on the policy implementation people, such as the PP and PM. With wirtually no hesitation, he accoded to this as a general guide in policy.

2. He then inquired by how much the DD/I area might be out with-25X9A2 out seriously affecting its projected work. I stated that the loss of positions from the present would be manageable but that anything more than this would be serious.

25X9A2

3. I said that there were "rumors" that the maximum relief the Agency might get from its 30 June on-duty figure would of which Mgency migut get as a would be only He denied that the Agency would settle for anything as small and assured me that we would have a chance to grow by

25X9A2

25X9A2 25X9A2

he The marit in this is, of course, that relief from the ceiling freeze will be such easier to obtain for a specific PP projects than for an emorphous mass such as the relief research activities.

5. Will you, therefore, please be tough with ID/A during the coming week, but do not disclose the contents of this memorandum except in the most general cort of way.

ROBERT AMORY, JR.
